Interpon D Structura

Quality, longevity and style in a textured finish

Your imagination starts with our finish

AkzoNobel

Interpon D Structura

Giving color and texture to your creativity

With its refined, textured finish, and extensive range of colors, it is no surprise that the Structura range of Interpon D powder coatings has become the first choice for architects who want style and performance for the buildings they imagine. Offering a choice of more than 80 colors from the Ready To Ship (RTS) range, architects can be assured that their creations are always on-trend, while the textured finish gives aluminum and steel surfaces an intriguing sense of quality and depth, with significantly higher gloss retention and resistance to color change.

The Interpon D Structura range is designed to be superdurable, with excellent levels of weatherability to withstand challenging climates and enable buildings – and your reputation – to stand the test of time. Its textured finish makes it more scratch resistant while it covers small defects on the substrate. The superdurability also makes Interpon D Structura range more sustainable, with a reduced cleaning cycle, so that less water and fewer chemicals are needed to keep surfaces looking fabulous all year-round.

Transparency and reliability

Creating futures that last

You can rely on us. Our Interpon D2525 Structura range delivers on its promised durability levels in terms of color retention and film integrity.

- Comes with a 25-year warranty for the D2000 series on the coating performance, when applied by an Interpon D Approved Applicator.
- Qualicoat Class 2 and GSB Florida 3 (Master).
- Meets the performance requirements of AMAA 2604 and BS EN 12206.

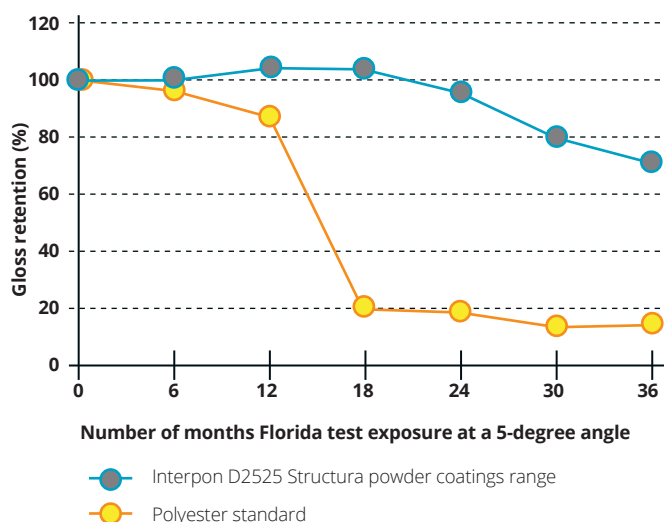

Building a sustainable future

Interpon D2525 Structura range is one of a family of products that is not just helping us to imagine the future it is also protecting it. Backed by an Environmental Product Declaration (EPD), the raw materials, manufacture and transportation associated with creating Interpon D have been assessed by an independent third-party for transparent sustainability credentials.

Florida testing – color and gloss retention

The Florida powder coating standard is one of the most stringent when it comes to classifying the durability of polyester powder coatings. Gloss and color retention are tested during exposure to UV radiation, high temperatures and humidity of the Florida climate. The Interpon D2525 powder coating has significant higher color and gloss retention than a standard durable coating.
